Canine Arthroscopy CE Course

Scottsdale, AZ **Los Angeles, CA**
July 23 **December 3**
Intermediate Stifle Elbow/Shoulder

2011 Schedule

Course Description

This course is an introduction to the basic technique of elbow, shoulder & stifle arthroscopy. Discussion of equipment needs and care, specific indications and methods to consistently achieve successful visualization and management of joint disorders will be discussed in a lecture format. Participants will learn to gain access to the elbow, shoulder & stifle, develop working portals and become familiar with instruments available for treatment of intra-articular lesions in a cadaver limb.

Goals and Objectives

Participants will learn:

- Troubleshooting arthroscopy equipment
- Importance of image capture
- Matching patient joint size to scope size
- Shaver blade recommendations
- Light post manipulation
- Camera orientation
- Systematic exam
- Monitor positioning
- Importance of accurate portal placement
- Limb positioning and room layout
- Triangulation
- Distension vs. extravasation
- Fluid management
- Homeostasis
- Description of lesions
- Indications
- Treatment of common lesions
- Positioning

Agenda

- 8:00** **Lecture** - Introduction to Arthroscopy
