New KNOTLESS Anchor CE Course Ohio State University Columbus, OH MARCH 31, 2012

Don't miss out on this CE opportunity to learn the newest and most innovative extracapsular stabilization technique available. The New Swivelock Anchor allows you to stabilize the joint by anchoring the Arthrex Vet System's FiberTape on the femoral fixation point without having to tie knots or use a crimp. Minimal equipment is required to get started using this technique. For more information about the Swivelock KNOTLESS Anchor system - [click here](#). If you would like to register for the CE Course at Ohio State University please see course information links below.
